# **BUILT-IN SIDE LOADING PROGRESSIVE SCAN DVD PLAYER**

Save space with the built-in progressive scan DVD player. Side loading player upconverts DVDs to near 720p resolution and features LG "Super-Multi" technology which plays back almost any recordable disc based media.

#### **HD RESOLUTION**

High definition television is the highest performance segment of the DTV system used in the US. It's a wide screen, high-resolution video image, coupled with multi-channel, compact-disc-quality sound.

LG HDTVs include 3 AV Modes, preset to optimize picture and sound settings based on "Cinema", "Sports" or "Game" content. AV Modes can be easily set with a convenient button on the remote control.

#### **CLEAR VOICE TECHNOLOGY**

Automatically enhances and amplifies the sound of human voice frequency range to help keep dialogue audible when background noise swells.

### **INVISIBLE SPEAKER SYSTEM**

LG's 2008 line of TVs include a unique invisible speaker system, tuned by renowned audio expert, Mr. Mark Levinson. Speakers are embedded in strategic spots behind the front cabinet and use minute vibrations to turn the entire front bezel into the speaker system. The result is a clean, polished look, and enhanced audio by increasing the "sweet spot" giving a wider sound field.
